22			☐ Pass ☐ Fail		
23			☐ Pass ☐ Fail		
24			☐ Pass ☐ Fail		
25			☐ Pass ☐ Fail		
26			☐ Pass ☐ Fail		

Note: Test a different call point each week so every one is tested in rotation. This sheet covers 26 weeks – print a second copy for the rest of the year. Weekly testing is commonly recommended in fire safety guidance and often a licence condition - check your own licence and fire risk assessment.

If a test fails: tell the manager the same day, arrange repair, record the action, and re-test. Record the date fixed.

This log is an organisational tool, not legal advice. Check requirements with your local council and a qualified adviser.
